

NZ Concrete Society Seminar Series 2010

Safe Construction with Concrete

➔ **AUCKLAND - THURSDAY 11 NOVEMBER 2010**

Why You and Your Employees Should Attend this Seminar

There is an increasing expectation on employers to be pro-active in their management of their businesses, from the point of view of Health and Safety, and increasingly, Environmental Management. This seminar will discuss the most common issues that face the construction industry on a day to day basis and offers solutions to these potentially expensive problems if they are not recognised and dealt with appropriately.

The seminar will address regulatory issues such as health & safety and environmental legislation and will explain your responsibilities and the consequence of non-compliance. Guiding principles for safe and environmentally responsible construction with concrete will be covered in detail. Finally the seminar will cover environmental issues from your local regional council perspective and conclude with examples from specific projects.

Other Benefits:

- Comprehensive resource through the seminar notes
- Knowledgeable and experienced speakers
- Networking with industry professionals

Who Should Attend?

- Site supervisors
- Leading hands
- Foremen and placers
- Engineers
